#### Issues to be Discussed

Issues	Claims / Figs	Prior Art	Discussed	Agreed	Not Agreed
(1)	Claim 1	Murley, in view of Verma	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
(2)			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

#### Brief Description of Discussion Topics:

Claim 1 recites determining a speculative structure of a database (where the actual structure of the database is unknown when the determining is performed), identifying a plurality of components using the speculative structure of the database, and generating a point-in-time image of a component using a data management resource.

Regarding the 112, first rejection, Applicants would like to discuss with the Examiner the support found in the specification for the "actual structure" element, as amended in the prior office action response.

Also, Applicants would like to discuss the Examiner's interpretation of Murley and Verma. Finally, Applicants would like to discuss possible amendments (if needed) to progress prosecution towards allowance.

An interview was conducted on the above-identified application on \_\_\_\_\_.

**NOTE:** This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
